March 2016 Newsletter

This is an informational newsletter about the newly updated 2016 web catalogue

Welcome to www.vegetableseeds.net.au newsletter March 2016.

Changes to the web catalogue are as follows:

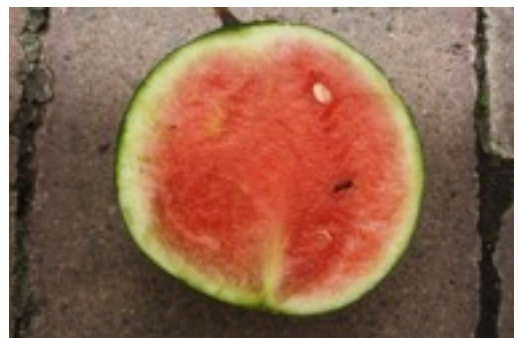

We have increased the number of seeds in a packet to 30 seeds of most of the green, dry, pinto, Tepary beans. With the exception of runner bean White Apollo which has 20 seeds a packet, Tas Green climbing bean which stays at 10 seeds per packet and Cascade Giant climbing green bean which has 20 seeds per packet.

We have deleted Jade, Pioneer, Slenderwax and Barlotti beans choosing to focus on our range of rare green, golden wax and barlotti beans which we believe should be available to home gardeners and are very hard to find elsewhere.

The weight of most of our bean seeds packets is approx. 15g a packet which we believe is ample for the home gardener to provide bucket loads of beans.

We have also deleted chervil and dill seeds because we are focusing more on the fine flavoured high yielding vegetable seeds in 2016.

Regrettably we cannot access quality Yellow Doll OP watermelon seeds in 2016, which is disappointing as this is probably one of the best cool climate true water melons to grow, we are still offering Sugar Baby watermelon \$4 for 30 seeds, which is an excellent cultivar for cool climates and a good alternative to Yellow Doll.

We are also focusing on high quality green manure seeds, so we are only offering the popular Negrita annual black oats, blue lupins, and pink serradella (serratas) in 2016.

We have had to increase the prices of all packets that were \$3.85 to \$4 a packet in 2016 and our range of rare beans are now all \$5.50 a packet. These are quality seeds.

New varieties/cultivars for 2016

We are now able to offer the following:

Achocha Fat Baby (see description in November 2015 Newsletter) 10 seeds for \$4

Achocha Giant Bolivian (see description in November 2015 newsletter) 5 seeds for \$4

Cucumber Boothby's Blonde, a beautiful very prolific apple cucumber. 10 seeds \$4

King Island kale 50 seeds for \$4.

Flower seeds of *Lupinus mutabilis* 20 seeds for \$4. We now have enough seeds of this to sell. Lupin flower seeds are very hard to source due to strict quarantine requirements.

Remember postage is still **FREE**.

Enjoy your garden wherever you may be.
